Enabled for the entire organization
Semantic Model Execute Queries REST API
Enabled for the entire organization
Use ArcGIS Maps for Power BI
Enabled for the entire organization
Users in the organization can use the ArcGIS Maps for Power BI visualization provided by Esri.
Enabled
By selecting "Enabled", you agree that ArcGIS Maps for Power BI may use Esri services located outside of your Power BI tenant's geographic region, compliance boundary, or national cloud instance. Esri may store and process your data in the United States or any other country in which Esri maintains facilities. Use of ArcGIS Maps for Power BI is subject to the Esri terms and privacy policy. Learn More.

Map and filled map visuals
Enabled for the entire organization
Allow people in your org to use the map and filled map visualizations in their reports.
Enabled
By selecting "Enabled", you agree that map and filled map visuals may use Bing services located outside of your Power BI tenant's geographic region, compliance boundary, or national cloud instance. This feature uses mapping capabilities that are powered in part by third parties, TomTom and 5K Telecom, and operate outside your tenant's geographic region, compliance boundary, or national cloud instance. Microsoft shares the address and location queries with these third parties, but not the name of the customer or end user who entered the query. This feature is non-regional and the queries you provide may be stored and processed in the United States or any other country in which Microsoft or its subprocessors operate. Use of map and filled map is subject to the following terms.
